NOTE FOR: ADDI

SUBJECT: Joint ICS-DoD Task Group on  
Collection Tasking Authority  
Transfer

The attached <sup>\*</sup>memo outlines the terms of reference for the subject task force. The ICS has noted to us separately that human intelligence assets will not be discussed. Given the command and control guidelines quoted on page 2, it seems CIA equities in this process reside more in the user arena than in the DS&T.

If you agree, how would you like to take this one on? If I'm not mistaken, your CRES folks are both product and system oriented. If you take on the job, you'll have to keep Evan in the loop. We understand that representatives identified to ICS thus far are generally at the GS-15/05-06 level.
